Reach Statement

REACH is a new European Community Regulation on chemicals and their safe use. It deals with the **R**egistration, **E**valuation, **A**uthorization and Restriction of **C**hemical substances. The new law entered into force on 1 June 2007.

The REACH Regulation gives greater responsibility to industry to manage the risks from chemicals and to provide safety information on the substances. Manufacturers and importers will be required to gather information on the properties of their chemical substances, which will allow their safe handling, and to register the information in a central database run by the European Chemicals Agency.

This regulation addresses products imported or marketed in the EU. Aeropres does not import or sell into this market directly, meaning that we are not required to register our products. Registration also requires quantities imported and other information unknown to our company that may be proprietary in some instances. Aeropres will assist and support the registration of the products sold to you by providing data as it is requested. Please feel free to contact me at techsupport.aeropres.com.
